

Council Service: Garbage and recycling Collection

Council can provide you with a garbage service if you so wish that allows you business garbage and recycling to be disposed off.

Land owners are responsible for arranging garbage services for their properties. Leasees need to speak to their land owners to arrange additional services if needed.

Garbage Service

Properties east of the Railway are collected on Wednesday morning; whilst properties in the west of the railways are collected on Thursday mornings.

Council advise the bins need to go out on the kerb the night before. The bin is black or very dark grey in colour and is a small, 120 litre size. This service is available for \$253 per financial year. Additional bins can be made available for \$129pa.

Recycling Service

Recycle bins are collected every fortnight with your garbage bin. This bin has a yellow lid and is (large) 240 litres in size. Council collects all the recycled materials together. Additional recycling bins can be made available free of charge.

Tips? - How can you help

What can be recycled?

- Bottle - glass or plastic
 - Steel or aluminium cans
 - All paper
 - Cardboard
 - Junk mail
 - Magazines
 - Newspapers
 - Milk and juice cartons
-
- Do not place plastic bags or garbage in the recycle bin, please empty the materials from the plastic bag into the recycle bin and then place the plastic bag in the garbage bin.
 - To ensure the reliability of Council's service it is recommended that bins be placed in driveways or between parked cars or on the gutter of the road Council requires 300 mm clear space on each side of the bins between parked cars to do this. It is also required that 4.5 metre clear space above the bin so placing the bin under trees is also acceptable.

For further information on Council's waste service please check Council's website on www.rockdale.nsw.gov.au, or ring our Customer Service Centre on 9562 1666.
